Your utility bill has been calculated using the rate structure passed by City Council in Ordinance 2006-109. The rate structure has a fixed base charge for water and for sewer plus a volume charge for each 1,000 gallons that pass through your meter. The base charge is different for each meter size. To determine your base charge, find your billing code that is printed on your bill in the section entitled Meter Reading Information and then match the billing code to the rate table above. Your volume charge is calculated per 1,000 gallons using the volume charge shown in the rate table above for water and for sewer.
